Water Construction Permit No. Request is for Entire Project Partial

Wastewater Construction Permit No. Request is for Entire Project Partial

Describe the portion for which approval is being requested (including pipe lengths, total number of manholes and pump stations).

Water

Wastewater

(2) Certification by the Engineer-of-Record

I, the undersigned professional engineer registered in Florida, certify the following:

- That this project has been constructed in accordance with the construction permit and engineering plans and specifications approved by the PSLUSD. The deviations noted herein will not prevent this project from functioning compliance with the PSLUSD standards and applicable regulations of Florida Department of Environmental Protection;
- That the as-built survey or record drawings for this project is complete and includes substantial deviations* from the approved engineering plans and specifications;
- That the O&M manual for the project has been prepared or examined by me, or by an individual(s) under my direct supervision, and that there is reasonable assurance, in my professional judgement, that the facilities when properly maintained and operated in accordance with this manual, will function as intended; and
- That, to the best of my knowledge and belief, all required tests have been performed and the new or modified facilities met the specified requirements.

This certification is based upon on-site observation of construction conducted by me or by a project representative under my direct supervision and upon review of shop drawings, test results/records, and record drawings performed by me or by a project representative under my direct supervision. The following is a description and explanation of substantial deviations* from the approved plans and specifications for the substantially completed portion of this project.
