

3 Reasons to

1. It's safe!

Your drinking water is tested more frequently than bottled water and is continuously monitored and treated according to federal standards.

2. It's less expensive!

Bottled water costs an average of \$4.50 per gallon, compared to fractions of a penny for water from your tap. That makes your tap water a thousand times less expensive than bottled water.

3. It's better for the environment!

Not all plastic water bottles make it to the recycling bin. Some are thrown away and end up in the landfill where it takes years for them to break down. Plastic bottles are also a major source of pollution.
