

PORT ST. LUCIE UTILITY SYSTEMS

3 Reasons to **HOOK UP** to sewer

1. It's better for your health!

Septic systems could fail, allowing wastewater to leach into private groundwater wells, which some people use for drinking water.

2. It's better for the waterways!

The St. Lucie River Estuary and Indian River Lagoon System are more protected because the potential nutrient input that contributes to algae blooms will be reduced.

3. It's better for the environment!

Wastewater is treated at a City wastewater treatment plant where the water is recycled for irrigation and the waste is used for compost.
