

# Edible Sludge Cake Recipe

## What you need:

- 1 (8 oz) package of cream cheese, softened
- $\frac{1}{2}$  cup chocolate syrup
- $\frac{1}{4}$  cup cocoa powder
- 1 package chocolate sandwich cookies
- 1 large plastic bag (1-gal size)
- 2 large bowls
- Hand mixer
- Spoon
- Wax paper
- Cookie sheet

## What you do:

1. Place cookies in plastic bag and break them up with a spoon until you get a dirt-like texture, then pour into bowl.
2. In second bowl mix the cream cheese and cocoa powder until light and fluffy, then add the chocolate syrup and mix again.
3. Fold the crushed cookies into the cream cheese mixture until all cookies are coated.
4. Take small handfuls of the mixture, mold into cakes, and place them onto a wax paper-lined cookie sheet.
5. Place the sheet in the freezer for about an hour.
6. This mixture is very sticky and messy, freezing them helps keep them together.
